

MPT TRAY

American Hydroponics

Multi-Purpose Tray (MPT)

The MPT is the perfect size growing tray designed for propagation and heavy duty growing. Although the MPT is lightweight, the tray is vacuum formed ABS plastic (no seams, no cracking) and is reinforced for rigidity. Priced economically, you can place several MPTs together to create a high performance seedling array. Designed with versatility in mind, the MPT comes undrilled with preplaced positions for fill/drain fittings to make it a fully operational Ebb & Flow tray.

With numerous uses not limited to hydroponics, the MPT makes a perfect companion to any Ebb & Flow or Nutrient Film Technique (NFT) system.

Here's our Top 10 list of hydroponic uses for the MPT:

1. Use as a seedling starter tray
2. Use as a soaking tray to correct the pH of Rockwool cubes for better success growing (Designed to hold one 12" or two 6" Rockwool cube slabs perfectly)
3. Easily converts to an Ebb & Flow system with the addition of an AmHydro Fitting Kit
4. Use with small net pots as a great Ebb & Flow tray
5. Use with Gro-Rocks for an Ebb & Flow tray for herb starts
6. Trickle flow with perlite for Mesculun mixes
7. Trickle flow 2" Oasis cubes for production of Baby Romaines
8. Easily converts to a propagation tray for cuttings and seedlings
9. Utility tray for tools, root gel, clippers, ties, etc.
10. Display tray for hydroponic lettuce and produce in farmers markets

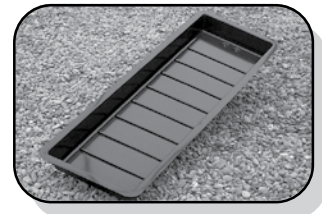

Plus...

11. Great for growing wheat grass
12. Excellent for use when planting or transplanting soil plants and flowers

Specifications & Options:

Black Multi-Purpose Growing Tray
(13" x 40" x 2 7/8")

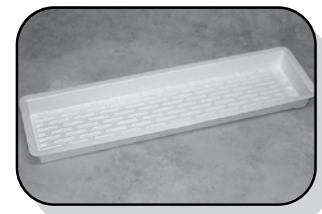

#91021

White Multi-Purpose Growing Tray
(13" x 45" x 3.5")

#91000

(White trays are UV stabilized to prevent cracking and discoloring. Keeps your water temperature 20% cooler!)

Accessory Options:

AmHydro Fitting Kit #91045
